DETAILED ACTION

Claims 1-19 are pending in this application. Claims 17 and 19 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Information Disclosure Statement

Applicant's Information Disclosure Statements, filed on 03 March 2004 has been considered. Please refer to Applicant's copies of the 1449 submitted herewith.

Response to Restriction

Applicants' election of Group I, claims 1-16 and 17 (in part), drawn to the compounds

represented by formula (I), and specific compound of Example 6,

, depicted in page 36 of the specification in response filed on 08 June 2006 is acknowledged. Because Applicants did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Therefore, the restriction requirement is deemed proper.

Art Unit: 1626

In accordance with M.P.E.P. 821.04 and *In re Ochiai*, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims and method of use claims commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until such time, a restriction between product claims and process is deemed proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The scope of the invention of the elected subject matter is as follows:

Compounds of formula I, , depicted in claim 1, wherein:

X is as defined; R, R¹, R³, R⁴ and R⁵ are as defined; W is N; Y is C₁₋₆ alkylene substituted by NR¹R²; R¹ is as defined; R² is SO₂heteroaryl group.

As a result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1, 2, 5, 6, and 13-20 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn compounds contain varying functional groups such as triazine, homopiperazinyl, thiomopholinyl, propylaminyl etc, which are chemically recognized to differ in structure and function. This recognized chemical diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 544 subclass

Art Unit: 1626

63(+)(thiomorpholine), class 540 subclass 450(+)(homopiperziny), class 544 subclass 180(+)(triazines), 548 subclass 400(+) pyrrolidines etc. Therefore the subject matter which are withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites “any of the Examples disclosed herein”. The Examples are described in the specification. Claims must, under modern claim practice, stand alone to define an invention, and incorporation into claims by express reference to the specification is not permitted. *Ex parte Fressola*, 27 USPQ 2d 1608 (1993). Therefore, Applicants need to either recite all the examples contemplated in the claim or amend the claim so that it it will not refer to anything in the specification.

Claim Objections

Claims 1-14 and 17 are objected to for containing non-elected subject matter.

Claim 18, which is directed to a method of use, will not be rejoined at this time because the claim is not allowable.
